

FOI-in-a-Box

Clear your FOI backlog in weeks, without burning out your team

FOI-in-a-Box, powered by Nuix, is proven inside Commonwealth and State agencies to deliver speed, accuracy and compliance.

The challenge every FOI team knows

Freedom of Information teams across government face the same mounting pressures:

- Growing backlog and immovable deadlines
- Data scattered across multiple formats and systems
- Increased risk of errors and non-compliance
- Staff burnout and high turnover

We understand these pressures because we've helped agencies face them and that's why we created FOI-in-a-Box.

Proven inside Australian government

- **90%** faster processing compared to manual FOI review.
- **3.5M** pages ingested in a fraction of the time it would take to process manually, reduced to 5,000 most relevant pages.
- In **4 weeks**, built and deployed the FOI solution, including 119 reusable AI models tailored to the department's unique records.
- Nuix is trusted in **25 Australian Federal Government agencies**, including National Security, ATO and ASIC.

What FOI-in-a-Box actually does

1. Secure, air-gapped appliance delivered and configured for your environment
2. Data collection follows your existing BAU process
3. Ingest over 1,000 data types from scanned PDFs and videos to handwritten notes
4. Automated processing:
 - Removes redundant, obsolete, and trivial (ROT) data
 - Generates a hyperlinked Table of Contents, sorted by document type and chronology
 - Extracts entities (people, organisations) for inclusion or exclusion
 - Applies all common "always" FOI exemptions with codes
 - Applies "specific" FOI exemptions with codes, greyed out for review
5. Human-in-the-loop review for accuracy and contextual judgement
6. Export final, compliant report complete with redactions, ready for release

Australian-built. Australian-owned. Australian-trusted.

FOI-in-a-Box is 100% sovereign. All technology is built here in Australia, with no offshore processing or data storage.

Delivered by Booka

- Proudly Indigenous-owned, with a commitment to strengthening Australia's digital capability.

Powered by Nuix

- An ASX-listed Australian technology company with globally recognised forensic and analytics capabilities.

Every dollar spent with us stays in Australia

- Supporting local jobs, communities and innovation.

This sovereignty means faster response times, secure data handling under Australian law and the confidence of knowing your investment strengthens Australia's own capability.

How FOI-in-a-Box changes the game

- **Faster turnaround** – meet deadlines, clear backlogs, reduce stress.
- **All-format ingestion** – PDFs, emails, images, handwritten notes, video, text messages and more!
- **Automated redaction** – PII detection and legislative rules built in.
- **Data mapping** – uncover links between people and organisations.
- **Proven compliance** – Deployed and trusted in multiple agencies
